2010
SUEUA EXECUTIVE

Tom Connell, by
Danielle Jelfs

President

Tom
is tall, but he's a friendly giant.

You
will see Tom everywhere around engineering. He is always there to lend a helping hand, cooking sausages and lifting heavy things. You will also see him riding around uni on his bike, don't try this yourself its way to high and you will get hurt.

Tom

has amazing hair, its texture is out of this world, touch it if you can. He also grows a wicked beard but watch out for the mutton chops they can be a little scary.

Tom

is not one to say no to a drink or twelve, he always makes a night out more interesting and usually ends up naked, or just about.

Tom

holds some pretty interesting conversations. He always has a few words of wisdom to add here and there but often they are followed with a general outcry of 'Tom too Far.' He takes the weird and absurd to a whole new level, but that's one of the things we love about him.

Brayden Mead, by Sam
Murray

Vice
President

Engineering

has many Alpha males, but there is only one king of the jungle in our parts. This part Lion, part Man stalks the walkways of engineering with feline grace. Sunlight glints of his luscious mane as he walks (or often rolls on his

skateboard) along the walkways, vowing to be the first cat to break Mach 10.

Don't

be put off by this fierce appearance. Brayden, or B-ray, as he's often called is not only one of the nicest guys around but also harbours an intellect and wisdom matched by few and exceeded by none. His knowledge isn't just limited to aeronautics and hair care, he has a doctorate of kebabs and a masters in goon laybacks. This year will see the great man-beast as Vice-president, rocking his engineering jungle with hilarity, cool costumes, great kebabs and amazing hair.

ROAARR

Sam Murray, by Michael
Drummond

Junior
Vice President

Put

simply: Sam's a great man. You can recognise him by the occasional facial growth and his colourful fisherman pants. Sam's outgoing, a storyteller, often telling of his escapades overseas and he's always keen to meet new people. He attends nearly every SUEUA event and often helps out on the BBQ's, so go up to him and have a yarn. Take him a beer if he looks thirsty.

Michael Drummond, by
Tom Connell

Treasurer

Bokka. Bokky mcbok bok.

An elusive creature, the Bok is known to assume a camouflage of a reserved and studious man. He lies dormant in his assumed identity, slowing his metabolism and waiting for an opportune moment.

Nearby, a herd of wild Sambuca cautiously raise their heads above the savannah long grass, unaware of the low lying Bok. Gingerly, they tread towards the water hole, seeking rehydration.

With a guttural bellow, the ferocious Bok leaps 6 foot in the air, sleek body resplendent against the African Sun. He consumes one, two, three Sambuca on his first sprint, pivots on his face and consumes six more. His belly full, Bok then climbs to precarious heights to survey his kingdom. His day over, he

rests, knowing that soon he will
reassume his camouflage and lie in wait for the next big hunt.

Bokka

is a civil engineering 3rd year, great for a talk and fantastic to
have a beer with. He'll be in charge of our monies this year, so you know where
to send the muffin baskets and bouquets of puppies.

Danielle Jelfs, by
Brayden Mead

Secretary

Since her first day in engineering Danielle
has been able to keep up with the boys when drinking, and most consider her one
of them when as she omits bodily functions with the best of them. Some might
say she lacks the wisdom or the 'balls' for her position, but don't be fooled
even though she is the youngest and the shortest of the executive she managed to beat the lot at drinking on
first year, well that is until she vomits and passes out (Note this has been
repeated many times since). Danielle definitely knows how to have a good time,
with many infamous nights ending passed out on the chemical engineering couches
after hours. Travelling to Engineering from the Northern Beaches daily, it
definitely can't be said that she lacks commitment as Rookie is always present
and drunk at all SUEUA events. When she isn't disproving the stories Sam comes
out with, she's easily sought out for any questions you may have about Civil
Engineering and university life in general.

OTHER ENGINEERING PERSONALITIES

Pat
James, 2009 SUEUA
President

Jonathan Bruck,
EWB
President

Eli
Fensom, SUWIE
President

Heather Walker,
SUCE
President

Liz
Dowsett, SUCES
President

Tash
Mehta, MUGS
President

Zak Vickers, SUEUA BBQ
Master

Joss Engebretsen,
SUEUA Cellar Master

Chris Rosiak, SUEUA
Web Master

Tim Ronan, SUEUA
Functions

Natalie Bennell, SUEUA
Functions, Sport

Will Stanham, SUEUA
Sports Rep

Tom Blaxland, SUEUA
Sports Rep

Winey Suen, Involved
with everything engineering!

Dave Shapira, 2009
SUEUA Treasurer
